Justine was amazing at keeping students informed and presenting material in a comprehensive and realistic manner.

The GSI encouraged participation and was constantly seeking new ways to engage the students with the material.

I love Justine. She's very kind, effective, and a good instructor. She is passionate about the material and conveys it well. She mixes it up, which is refreshing. Overall great GSI.

Justine was very organized and enthusiastic in every section. She was very quick responding to questions and emails, and obviously put in lots of effort to help students understand the material. Some of her activities were creative and helped me understand the material. All around one of the very best GSI's I have had at Berkeley!

Justine was very helpful in breaking down the main points of the readings and lecture. A lot of the concepts and content are very dense but the organization and method of this course were very helpful.

Justine was organized and her sections were really helpful. She not only let us submit questions in advance, but her sections adapted different types of learners. We would have discussions, debates, games. It was fun, I enjoyed this section.

One of the best GSIs I've had. She was extremely organized in her lecture style, had immense knowledge on the subject, and was very helpful and patient when she was asked questions.

I enjoyed Justine's enthusiasm. Additionally, I enjoyed her having us do debates.

Justine was very well organized and helpful throughout the entire semester. She demonstrated clear knowledge and passion regarding the subject of intervention and conflict.

Very accessible and approachable for assistance.

Justine is very charismatic and helpful when I have questions or concerns. She knows the material really well and presented the information in ways that made abstract concepts understandable.

Justine was always really organized and had a unique way of explaining complicated subjects. The group work in discussions was really useful because I could easily see different interpretations of the course material. I also really liked the simulation.
